The X Window System is a graphical computer interface that is standard in Linux, Unix, and UNIX-like operating systems. It is similar to Microsoft Windows, and to DOS windowing systems, but is more sophisticated. This software provides a keyboard macro program, which allows you to specify a series of keyboard strokes which will be triggered by the press of a single key. Mozilla Description: Mozilla Firefox is a freeware web browser developed by the Mozilla Foundation and released in May 2003. The name "Mozilla" is a homage to the Netscape navigator. It is a fork of the product, developed by the Netscape staff. Mozilla is included as a standard feature of the Mozilla Suite of applications. EKG Description: Real-time and powerful EKG (Electrocardiogram) software. Features: Stability Easy to use High quality In addition to the basic features of the software, this is a real-time and powerful EKG (Electrocardiogram) software. The operations of the software are simple and easy. It is very stable and does not slow down the system. LED Description: Bright LED projectors are available in various shapes, colors, and sizes. They use the light-emitting diodes (LEDs) to project light beams, instead of using the bulbs or xenon bulbs. LEDs are a very bright source of light, with high luminous efficiency. They consume very little power and are inexpensive to produce. In addition, LED projectors have many advantages over conventional projectors, including long-lasting life and maintenance-free, as well as solid-state design, which eliminates the need to change or replace bulbs. MFD Description: This software allows you to control various industrial machinery through a wireless network. It is a software that offers a full networking control tool for all industrial and commercial equipment. The software is based on the EtherCat (IEEE 802.3) protocol, which allows you to talk directly to a wide variety of industrial machines and systems. It can also be used to control other machines and systems over a network. About Linux: Linux is a family of GNU/Linux operating systems, either completely free, or nearly free, depending on the degree to which users are granted rights to modify and redistribute the software. Linux is generally distributed under the GNU General Public License (GPL). The Linux kernel is written from scratch 81e310abbf

In this image you can see a list of posts with number of stars by the post's author (located at the top-right). When an answer or question is starred, the stars are marked with a plus sign (and a white star is added). On the other hand, when a user has been awarded points, the stars are marked with a minus sign (and a white star is added) and I am wondering why. This results in posts having an effect on the overall ranking. For example, when the author of a question has been awarded 5 stars (+5), the question is higher ranked on the list than when the author has been awarded 0 stars (-5). A: The rating system uses the following criteria for the stars: +1 for a great answer +2 for a great answer and answer in duplicate +3 for a great answer and answer in duplicate and community wiki +4 for a great answer and answer in duplicate and community wiki and edit +5 for a great answer and answer in duplicate and community wiki, edit, community wiki, and bountied +6 for a great answer and answer in duplicate, community wiki, edit, community wiki, and bountied +7 for a great answer and answer in duplicate, community wiki, edit, community wiki, bountied, and featured +8 for a great answer and answer in duplicate, community wiki, edit, community wiki, bountied, featured, and ♦ moderator attention +9 for a great answer and answer in duplicate, community wiki, edit, community wiki, bountied, featured, and ♦ moderator attention and ♦ moderator suspended +10 for a great answer and answer in duplicate, community wiki, edit, community wiki, bountied, featured, ♦ moderator attention, ♦ moderator suspended and ♦ moderator declined +11 for a great answer and answer in duplicate, community wiki, edit, community wiki, bountied, featured, ♦ moderator suspended, ♦ moderator declined, ♦ moderator locked, ♦ moderator banned and �
